Professional Summary

Highly accomplished and results-oriented Lead Machine Learning Scientist with 8+ years of experience in developing and deploying cutting-edge AI/ML solutions across diverse industries. Proven ability to lead and mentor teams, translate complex business problems into actionable machine learning models, and deliver significant improvements in efficiency and profitability. Expertise in deep learning, natural language processing, and computer vision, coupled with strong programming skills in Python, C++, and R, and proficiency in cloud computing platforms like AWS. Seeking a challenging and impactful role where I can leverage my expertise to drive innovation and contribute to the success of a forward-thinking organization.

Education

- **University of Oxford, Oxford, UK**
  - Doctor of Philosophy (Ph.D.), Computer Science, 2015
  - Dissertation: "Novel Deep Learning Architectures for Natural Language Understanding"
  - GPA: 4.0/4.0
- **University of Oxford, Oxford, UK**
  - Master of Science (MSc), Computer Science, 2013
  - GPA: 3.9/4.0
- **University of Cambridge, Cambridge, UK**
  - Bachelor of Science (BSc), Mathematics, 2011
  - GPA: 3.8/4.0

Technical Skills

- **Programming Languages:** Python (expert), C++ (proficient), R (proficient), Java (intermediate)
- **Machine Learning Libraries:** Scikit-learn (expert), TensorFlow/Keras (expert), PyTorch (proficient), XGBoost (proficient)
- **Deep Learning Frameworks:** TensorFlow, Keras, PyTorch

- **Cloud Computing:** AWS (EC2, S3, Lambda, SageMaker), Google Cloud Platform (GCP) (basic)
- **Databases:** SQL, NoSQL (MongoDB)
- **Big Data Technologies:** Spark, Hadoop (basic)
- **Data Visualization:** Matplotlib, Seaborn, Tableau

Professional Experience

- **Lead Machine Learning Scientist, Synthetica Global, San Francisco, CA** (2018 – Present)
    - Led a team of 5 data scientists in the development and deployment of a novel recommendation engine resulting in a 25% increase in customer engagement.
    - Developed and implemented a deep learning model for fraud detection, reducing fraudulent transactions by 15%.
    - Mentored junior data scientists in best practices for data analysis, model building, and deployment.
    - Successfully secured funding for new AI/ML initiatives through compelling presentations and data-driven proposals.
- **Senior Machine Learning Engineer, Innovatech Solutions, Mountain View, CA** (2016 – 2018)
    - Developed and deployed machine learning models for various clients across different industries including finance, healthcare, and retail.
    - Designed and implemented data pipelines for efficient data processing and model training.
    - Collaborated with cross-functional teams to define project requirements and deliver high-quality solutions.
- **Research Scientist, Oxford University AI Lab, Oxford, UK** (2015 – 2016)
    - Conducted research on novel deep learning architectures for natural language processing.
    - Published research findings in top-tier conferences and journals.
    - Presented research results at international conferences.

AI/ML Projects

- **Recommendation Engine (Synthetica Global):** Developed a hybrid recommendation system using collaborative filtering, content-based filtering, and deep learning techniques. Improved customer engagement by 25%. (Python, TensorFlow, AWS SageMaker)
- **Fraud Detection System (Synthetica Global):** Built a deep learning model for detecting fraudulent transactions using a combination of LSTM networks and anomaly detection algorithms. Reduced fraudulent transactions by 15%. (Python, PyTorch, AWS EC2)
- **Natural Language Processing (Oxford University AI Lab):** Developed a novel deep learning architecture for natural language understanding that

achieved state-of-the-art results on several benchmark datasets. (Python, TensorFlow, Keras)

- **Image Classification (Innovatech Solutions):** Developed a convolutional neural network for image classification, achieving 95% accuracy on a challenging dataset. (Python, TensorFlow, AWS EC2)
