Zara Huxley (123) 456-7890 | zara.huxley@email.com | linkedin.com/in/zarahuxley | github.com/zarahuxley

Professional Summary

Highly accomplished and results-oriented Principal Data Architect with 12+ years of experience leading and executing complex AI/ML initiatives within large-scale organizations. Proven ability to design, develop, and deploy robust and scalable data solutions leveraging cutting-edge technologies, including cloud computing platforms and advanced machine learning algorithms. Expertise in translating business requirements into actionable data strategies, optimizing data pipelines, and mentoring junior data scientists and engineers. Passionate about leveraging the power of AI/ML to drive innovation and solve challenging business problems.

Education

- **University of Oxford, Oxford, UK** – Master of Science (MSc) in Computer Science, 2011
    - Specialization: Artificial Intelligence and Machine Learning
    - GPA: 3.9/4.0
- **University of Oxford, Oxford, UK** – Bachelor of Science (BSc) in Mathematics, 2009
    - GPA: 3.8/4.0

Technical Skills

- **Programming Languages:** Python (Expert), Java (Proficient), C++ (Proficient), R (Intermediate)
- **Machine Learning Libraries & Frameworks:** TensorFlow (Expert), Keras (Expert), PyTorch (Proficient), Scikit-learn (Expert), XGBoost (Proficient)
- **Cloud Computing:** Google Cloud Platform (GCP) (Expert), including Compute Engine, Cloud Storage, BigQuery, Dataflow, Dataproc, AI Platform
- **Databases:** SQL (Expert), NoSQL (Proficient), including MongoDB, Cassandra
- **Big Data Technologies:** Spark, Hadoop, Hive
- **Data Visualization:** Tableau, Matplotlib, Seaborn
- **Version Control:** Git

Professional Experience

- **Principal Data Architect, Veridian Dynamics, New York, NY** | 2018 – Present

    - Led the design and implementation of a large-scale AI-powered recommendation engine resulting in a 25% increase in customer engagement and a 15% increase in sales.

    - Developed and deployed a real-time fraud detection system using machine learning algorithms, reducing fraudulent transactions by 30%.
    - Mentored and trained a team of 5 junior data scientists and engineers.
    - Successfully migrated on-premise data infrastructure to Google Cloud Platform (GCP), improving scalability and reducing operational costs by 20%.
    - Defined and implemented data governance policies and procedures, ensuring data quality and compliance with regulatory requirements.

- **Senior Data Scientist, OmniCorp, San Francisco, CA** | 2015 – 2018
    - Developed and deployed predictive models for customer churn prediction, resulting in a 10% reduction in churn rate.
    - Built and maintained data pipelines using Spark and Hadoop for processing large datasets.
    - Conducted A/B testing to optimize marketing campaigns, resulting in a 15% increase in conversion rates.
    - Collaborated with cross-functional teams including product, engineering, and marketing.

- **Data Scientist, Cyberdyne Systems, Los Angeles, CA** | 2011 – 2015
    - Developed and implemented machine learning models for various applications, including natural language processing and image recognition.
    - Performed data cleaning, preprocessing, and feature engineering.
    - Evaluated model performance and tuned hyperparameters.

AI/ML Projects

- **Real-time Fraud Detection System (Veridian Dynamics):** Developed a real-time fraud detection system using a combination of supervised and unsupervised machine learning techniques, including anomaly detection and classification algorithms. Deployed on GCP using Kubernetes for scalability and reliability. Achieved 95% accuracy in detecting fraudulent transactions.

- **Customer Churn Prediction Model (OmniCorp):** Developed a predictive model for customer churn using logistic regression, support vector machines, and random forests. Improved model accuracy by 15% through feature engineering and hyperparameter tuning. Reduced customer churn by 10%.

- **Image Recognition System (Cyberdyne Systems):** Developed an image recognition system using convolutional neural networks (CNNs) for object detection and classification. Achieved 90% accuracy on a benchmark dataset. Utilized TensorFlow and Keras for model development and training.

- **Natural Language Processing (NLP) Chatbot (Personal Project):** Developed a conversational chatbot using NLP techniques, including tokenization, stemming, and sentiment analysis. Utilized Python and various NLP libraries.
