Professional Summary

Highly motivated and results-oriented Computer Vision Specialist with 5+ years of experience at Innovate AI Labs, specializing in the development and implementation of cutting-edge AI/ML solutions. Proven ability to leverage deep learning techniques, particularly within the context of computer vision, to solve complex business problems. Expertise in Go, R, Java, and cloud platforms like GCP, coupled with a strong foundation in deep learning frameworks such as Hugging Face Transformers and Keras. Seeking a challenging role where I can contribute my skills and experience to a dynamic and innovative team.

Education

- **Carnegie Mellon University**, Pittsburgh, PA
  - Master of Science in Robotics, May 2018
  - GPA: 3.9/4.0
  - Thesis: "Real-time Object Detection and Tracking using Deep Convolutional Neural Networks"
- **Carnegie Mellon University**, Pittsburgh, PA
  - Bachelor of Science in Computer Science, May 2016
  - GPA: 3.8/4.0
  - Minor: Mathematics

Technical Skills

- **Programming Languages:** Go, R, Java, Python (NumPy, Pandas, Scikit-learn), C++
- **Deep Learning Frameworks:** TensorFlow, Keras, PyTorch, Hugging Face Transformers
- **Cloud Platforms:** Google Cloud Platform (GCP) (Compute Engine, Cloud Storage, BigQuery), AWS (S3, EC2)
- **Computer Vision Libraries:** OpenCV, scikit-image
- **Databases:** SQL, NoSQL (MongoDB)
- **Tools:** Git, Docker, Kubernetes

Professional Experience

- **Computer Vision Specialist, Innovate AI Labs**, Pittsburgh, PA (June 2018 – Present)
    - Led the development and deployment of a real-time object detection system for autonomous vehicles, resulting in a 15% increase in accuracy and a 10% reduction in processing time.
    - Designed and implemented a novel deep learning model for image segmentation, improving the accuracy of medical image analysis by 20%.
    - Developed and maintained a robust pipeline for data preprocessing, model training, and evaluation using GCP.
    - Mentored junior engineers in best practices for AI/ML development and deployment.
    - Contributed to the development of a new product line focused on AI-powered security systems.
- **Software Engineering Intern, Tech Solutions Inc.**, Pittsburgh, PA (Summer 2017)
    - Developed and implemented a high-performance algorithm for data processing, resulting in a 25% improvement in processing speed.
    - Contributed to the development of a new software application using Java and Spring framework.

AI/ML Projects

- **Real-time Object Detection for Autonomous Vehicles:** Developed a real-time object detection system using YOLOv5 and deployed it on a Raspberry Pi. Achieved 95% accuracy on the COCO dataset. (GitHub Repository: github.com/julianstratton/autonomous-vehicle-object-detection)
- **Medical Image Segmentation using U-Net:** Developed a U-Net based model for medical image segmentation, achieving state-of-the-art results on the ISBI 2012 challenge dataset. (GitHub Repository: github.com/julianstratton/medical-image-segmentation)
- **Sentiment Analysis of Social Media Data:** Developed a sentiment analysis model using Hugging Face Transformers to analyze social media data and predict customer sentiment. Achieved 90% accuracy on a custom dataset. (GitHub Repository: github.com/julianstratton/social-media-sentiment-analysis)
