Maeve Thornton

(412) 555-1212 | maeve.thornton@email.com | linkedin.com/in/ maevethornton | github.com/maevethornton

Professional Summary

Highly motivated and results-oriented Machine Learning Research Fellow with 3+ years of experience at Innovate AI Labs, specializing in the development and deployment of cutting-edge AI/ML solutions. Proven ability to translate complex research into practical applications, leveraging expertise in deep learning, natural language processing, and cloud computing. Seeking a challenging role where I can contribute to the advancement of AI and its positive impact on various industries.

Education

Carnegie Mellon University, Pittsburgh, PA * **Master of Science in Machine Learning**, May 2020 * GPA: 3.9/4.0 * Thesis: "Novel Approaches to Few-Shot Learning using Meta-Learning Techniques" * **Bachelor of Science in Computer Science**, May 2018 * GPA: 3.8/4.0 * Minor: Mathematics

Technical Skills

Programming Languages: Python (Expert), R (Proficient), Go (Intermediate)

Deep Learning Frameworks: PyTorch (Expert), TensorFlow (Proficient), Hugging Face Transformers (Expert)

Cloud Platforms: Microsoft Azure (Expert), AWS (Intermediate), Google Cloud Platform (Basic)

Databases: SQL, NoSQL (MongoDB)

Tools & Technologies: Git, Docker, Kubernetes, Jupyter Notebooks, Matplotlib, Seaborn

Professional Experience

Machine Learning Research Fellow | Innovate AI Labs | Pittsburgh, PA | June 2020 – Present

- Led the research and development of a novel deep learning model for sentiment analysis, resulting in a 15% improvement in accuracy compared to state-of-the-art models.
- Developed and deployed a real-time anomaly detection system using PyTorch and Azure cloud services, significantly reducing operational downtime for a major client.
- Collaborated with a team of engineers and researchers to design and implement a scalable machine learning pipeline for processing large datasets.
- Mentored junior researchers and provided technical guidance on various AI/ML projects.
- Published research findings in peer-reviewed conferences and journals.
- Presented research work at internal and external conferences and workshops.

Software Engineering Intern | Tech Solutions Inc. | Pittsburgh, PA | June 2019 – August 2019

- Developed and maintained several internal tools using Python and Django.
- Contributed to the improvement of existing software systems.
- Gained experience in agile software development methodologies.

AI/ML Projects

Project 1: Sentiment Analysis of Social Media Data

- Developed a deep learning model using BERT and PyTorch to analyze sentiment in social media data.
- Achieved state-of-the-art results on several benchmark datasets.
- Deployed the model on a cloud platform for real-time analysis.

Project 2: Anomaly Detection in Network Traffic

- Developed a real-time anomaly detection system using LSTM networks and PyTorch.
- The system was able to detect anomalies with high accuracy and low latency.
- The system was deployed on Azure cloud services.

Project 3: Image Classification using Transfer Learning

- Developed a highly accurate image classification model using transfer learning with pre-trained models from TensorFlow Hub.
- Achieved high accuracy on a challenging image classification dataset.
- The model was deployed on a web application using Flask.

Project 4: Natural Language Generation using GPT-2

- Used GPT-2 to generate human-quality text for various applications.
- Explored different techniques for fine-tuning GPT-2 on specific tasks.
- Evaluated the performance of the model using various metrics.
