Maeve Pendelton (617) 555-1212 | maeve.pendleton@email.com | linkedin.com/in/maevependleton | github.com/maevependleton

Professional Summary

Highly accomplished and results-oriented Lead Machine Learning Scientist with 8+ years of experience leading and mentoring teams in the development and deployment of cutting-edge AI/ML solutions. Proven ability to translate complex business problems into innovative, scalable, and high-performing machine learning models. Expertise in deep learning, natural language processing, and computer vision, coupled with strong programming skills and a deep understanding of cloud computing infrastructure. Seeking a challenging and impactful role where I can leverage my expertise to drive significant business value.

Education

Massachusetts Institute of Technology (MIT), Cambridge, MA * Doctor of Philosophy (Ph.D.), Electrical Engineering and Computer Science, 2015 * Dissertation: "Novel Architectures for Deep Reinforcement Learning in Robotics" * Master of Science (M.S.), Electrical Engineering and Computer Science, 2013 * Bachelor of Science (B.S.), Electrical Engineering and Computer Science, 2011

Technical Skills

- **Programming Languages:** Go, Java, C++, Python (NumPy, Pandas, Scikit-learn), R
- **Deep Learning Frameworks:** TensorFlow, Keras, PyTorch, Hugging Face Transformers
- **Cloud Computing:** AWS (EC2, S3, Lambda, SageMaker), Google Cloud Platform (GCP)
- **Databases:** SQL, NoSQL (MongoDB, Cassandra)
- **Big Data Technologies:** Spark, Hadoop
- **Version Control:** Git
- **Operating Systems:** Linux, macOS, Windows

Professional Experience

Lead Machine Learning Scientist, Quantum Horizon Corp., Boston, MA | June 2019 – Present

- Led a team of 5 machine learning engineers in the development and deployment of a real-time fraud detection system, resulting in a 25% reduction in fraudulent transactions within the first year.

- Designed and implemented a novel deep learning model for natural language processing, achieving state-of-the-art results on a key internal benchmark.
- Mentored junior engineers in best practices for model development, deployment, and monitoring.
- Successfully secured funding for new AI/ML initiatives, demonstrating strong communication and presentation skills.
- Implemented a robust CI/CD pipeline for machine learning models, significantly reducing deployment time and improving model reliability.

Senior Machine Learning Engineer, NovaTech Solutions, Cambridge, MA | June 2017 – June 2019

- Developed and deployed several machine learning models for various clients across different industries, including finance, healthcare, and retail.
- Utilized a variety of machine learning techniques, including supervised learning, unsupervised learning, and reinforcement learning.
- Collaborated with cross-functional teams to define project requirements, develop solutions, and deliver results.
- Contributed to the development of internal tools and libraries for machine learning model development and deployment.

Research Assistant, MIT Artificial Intelligence Lab, Cambridge, MA | September 2013 – May 2015

- Conducted research on deep reinforcement learning algorithms for robotics applications.
- Published several papers in top-tier conferences and journals.
- Presented research findings at international conferences.

AI/ML Projects

- **Real-time Fraud Detection System (Quantum Horizon Corp.):** Developed a deep learning-based system for detecting fraudulent transactions in real-time, utilizing a combination of LSTM networks and anomaly detection techniques. Resulted in a 25% reduction in fraudulent transactions.
- **Natural Language Processing Model for Sentiment Analysis (Quantum Horizon Corp.):** Designed and implemented a BERT-based model for sentiment analysis, achieving state-of-the-art results on a key internal benchmark.
- **Deep Reinforcement Learning for Robotics (MIT AI Lab):** Developed novel deep reinforcement learning algorithms for controlling robotic manipulators, resulting in improved performance on complex tasks. Published in *Robotics: Science and Systems*.

- **Image Classification Model for Medical Diagnosis (NovaTech Solutions):** Developed a convolutional neural network (CNN) for classifying medical images, achieving high accuracy in identifying various diseases.
