Professional Summary

Highly accomplished and results-oriented Lead Machine Learning Scientist with 8+ years of experience leading and contributing to the development and deployment of cutting-edge AI/ML solutions at Synthetica Global. Proven ability to translate complex business problems into effective machine learning models, leveraging expertise in deep learning, natural language processing, and computer vision. Adept at managing teams, mentoring junior scientists, and collaborating with cross-functional teams to deliver impactful results. Passionate about pushing the boundaries of AI and its applications across diverse industries.

Education

- **Imperial College London, London, UK** – M.Sc. in Artificial Intelligence, 2015
 - GPA: 3.9/4.0
 - Thesis: "Novel Applications of Deep Reinforcement Learning in Robotics"
- **Imperial College London, London, UK** – B.Sc. in Computer Science, 2013
 - GPA: 3.8/4.0
 - Dean's List: All Semesters

Technical Skills

- **Programming Languages:** R, C++, Java, Python (NumPy, Pandas, Scikit-learn)
- **Deep Learning Frameworks:** PyTorch, TensorFlow/Keras
- **Cloud Computing:** AWS (EC2, S3, Lambda, SageMaker)
- **Databases:** SQL, NoSQL (MongoDB)
- **Big Data Technologies:** Spark, Hadoop
- **Version Control:** Git
- **Operating Systems:** Linux, Windows, macOS

Professional Experience

- **Lead Machine Learning Scientist, Synthetica Global, London, UK** (2018 – Present)
 - Led a team of 5 data scientists in the development and deployment of a novel fraud detection system, resulting in a 25% reduction in fraudulent transactions.
 - Developed and implemented a real-time recommendation engine using deep learning techniques, increasing user engagement by 15%.

- Mentored junior data scientists in best practices for model development, deployment, and monitoring.
 - Successfully secured funding for new AI/ML initiatives through compelling presentations and data-driven justifications.
 - Oversaw the entire machine learning lifecycle, from data collection and preprocessing to model deployment and maintenance.
- **Machine Learning Engineer, Innovatech Solutions, London, UK (2015 – 2018)**
 - Designed and implemented machine learning models for various clients across different industries, including finance, healthcare, and retail.
 - Developed and deployed predictive models using various algorithms, including regression, classification, and clustering.
 - Collaborated with cross-functional teams to integrate machine learning models into existing systems.
 - Contributed to the development of a new machine learning platform for internal use.

AI/ML Projects

- **Fraud Detection System (Synthetica Global):** Developed a deep learning-based fraud detection system using PyTorch and AWS SageMaker. Achieved 95% accuracy in detecting fraudulent transactions. Utilized LSTM networks for time series analysis of transaction data.
- **Real-time Recommendation Engine (Synthetica Global):** Built a real-time recommendation engine using collaborative filtering and deep learning techniques. Improved user engagement metrics by 15%. Deployed the model on AWS Lambda for scalability and low latency.
- **Image Recognition System (Innovatech Solutions):** Developed an image recognition system using convolutional neural networks (CNNs) for a healthcare client. Achieved 92% accuracy in identifying medical images. Utilized TensorFlow/Keras for model development.
- **Natural Language Processing (NLP) Chatbot (Personal Project):** Built a conversational chatbot using NLP techniques and Python libraries such as NLTK and spaCy. The chatbot is capable of understanding and responding to user queries in natural language.
