

Kaelen Beaumont

(412) 555-1212 | kaelen.beaumont@email.com | [linkedin.com/in/kaelenbeaumont](https://www.linkedin.com/in/kaelenbeaumont) | github.com/kaelenb

Professional Summary

Highly accomplished and results-oriented Principal Data Architect with 10+ years of experience in designing, developing, and deploying sophisticated AI/ML solutions within large-scale enterprise environments. Proven ability to lead cross-functional teams, translate complex business needs into technical specifications, and deliver innovative solutions that drive significant business value. Expertise in developing and implementing robust data pipelines, machine learning models, and cloud-based infrastructure using cutting-edge technologies. Passionate about leveraging the power of AI/ML to solve challenging problems and create impactful results.

Education

Carnegie Mellon University, Pittsburgh, PA * Master of Science in Computer Science, May 2013 * Specialization: Artificial Intelligence * GPA: 3.9/4.0 * Thesis: "Novel Approaches to Deep Reinforcement Learning for Autonomous Navigation"
* **Bachelor of Science in Computer Science**, May 2011 * GPA: 3.8/4.0

Technical Skills

Programming Languages: Java, Go, C++, Python (Pandas, NumPy, Scikit-learn), R
Deep Learning Frameworks: TensorFlow, PyTorch, Keras **Cloud Platforms:** Microsoft Azure (Azure Machine Learning, Azure Databricks, Azure Cosmos DB), AWS (Amazon SageMaker, S3, EC2), GCP (Google Cloud AI Platform, BigQuery)
Databases: SQL Server, PostgreSQL, MySQL, MongoDB, Cassandra **Big Data Technologies:** Hadoop, Spark, Hive **Data Visualization:** Tableau, Power BI
Version Control: Git **Containerization:** Docker, Kubernetes

Professional Experience

Innovate AI Labs, Pittsburgh, PA Principal Data Architect | June 2020 – Present

- Led the design and implementation of a large-scale AI-powered recommendation engine for a major e-commerce client, resulting in a 25% increase in conversion rates.
- Developed and deployed a real-time fraud detection system using machine learning algorithms, reducing fraudulent transactions by 15%.
- Architected and implemented a cloud-based data pipeline for processing and analyzing terabytes of data daily, improving data processing efficiency by 40%.
- Mentored and guided junior data scientists and engineers in best practices for data engineering and machine learning.
- Spearheaded the adoption of new technologies and methodologies to improve the efficiency and scalability of AI/ML projects.

Data Science Solutions, Inc., Boston, MA Senior Data Scientist | June 2017 – June 2020

- Developed and deployed predictive models for customer churn, improving customer retention by 10%.
- Conducted A/B testing to optimize marketing campaigns, resulting in a 15% increase in customer acquisition.
- Built and maintained data pipelines for processing and analyzing large datasets using Spark and Hadoop.
- Collaborated with cross-functional teams to define business requirements and translate them into technical specifications.

Tech Solutions Group, New York, NY Data Scientist | June 2013 – June 2017

- Developed and implemented machine learning models for various applications, including image recognition, natural language processing, and time series forecasting.
- Performed data cleaning, preprocessing, and feature engineering to improve the accuracy of machine learning models.
- Presented findings and recommendations to stakeholders using clear and concise visualizations.

AI/ML Projects

Project 1: Real-time Fraud Detection System (Innovate AI Labs) * Developed a real-time fraud detection system using a combination of anomaly detection and classification algorithms. Utilized TensorFlow and Azure Machine Learning for

model training and deployment. Achieved a 95% accuracy rate in detecting fraudulent transactions.

Project 2: AI-Powered Recommendation Engine (Innovate AI Labs) * Designed and implemented a recommendation engine using collaborative filtering and content-based filtering techniques. Leveraged PyTorch and Azure Databricks for model training and deployment. Resulted in a 25% increase in conversion rates for the e-commerce client.

Project 3: Predictive Maintenance Model (Data Science Solutions, Inc.) * Developed a predictive maintenance model for industrial equipment using time series analysis and machine learning. Utilized Python (Scikit-learn) and deployed the model using a RESTful API. Improved equipment uptime by 10% and reduced maintenance costs by 8%.
