Professional Summary

Highly accomplished and results-oriented Senior AI Engineer with 7+ years of experience at Innovate AI Labs, specializing in the design, development, and deployment of cutting-edge machine learning solutions. Proven ability to leverage advanced AI/ML techniques, including deep learning and natural language processing, to solve complex business problems and drive significant improvements in efficiency and performance. Expertise in C++, Python, Java, and cloud platforms like Microsoft Azure. Passionate about pushing the boundaries of AI and contributing to innovative projects with a focus on ethical and responsible AI development.

Education

Imperial College London, London, UK |

MSc in Artificial Intelligence, 2016

BSc in Computer Science, 2014

GPA: 3.9/4.0

Technical Skills

Programming Languages: C++, Python (Pandas, NumPy, Scikit-learn), Java, R

Deep Learning Frameworks: TensorFlow, PyTorch, Hugging Face Transformers

Cloud Platforms: Microsoft Azure (Azure Machine Learning, Azure Cognitive Services), AWS (Amazon SageMaker), Google Cloud Platform (GCP)

Databases: SQL, NoSQL (MongoDB, Cassandra)

Big Data Technologies: Spark, Hadoop

Version Control: Git

Other: Docker, Kubernetes, Agile methodologies

Professional Experience

Senior AI Engineer, Innovate AI Labs, London, UK | 2019 – Present

* Led the development and deployment of a novel deep learning model for fraud detection, resulting in a 25% reduction in fraudulent transactions. * Designed and implemented a real-time natural language processing system for customer service, improving customer satisfaction scores by 15%. * Mentored junior engineers in best practices for AI/ML development and deployment. * Successfully secured funding for three new AI/ML projects, totaling £1.5 million. * Collaborated with cross-functional teams to integrate AI/ML solutions into existing business processes. * Developed and maintained robust and scalable AI/ML pipelines using CI/CD practices.

AI Engineer, Tech Solutions Ltd., London, UK | 2017 – 2019

* Developed and deployed several machine learning models for various clients, including a recommendation system for an e-commerce platform and a predictive maintenance model for a manufacturing company. * Contributed to the development of a new AI platform for the company, improving the efficiency of AI/ML development by 30%. * Conducted research on cutting-edge AI/ML techniques and implemented them into existing projects.

AI/ML Projects

Fraud Detection System (Innovate AI Labs): Developed a deep learning model using TensorFlow and LSTM networks to detect fraudulent transactions in real-time. Achieved 95% accuracy in identifying fraudulent transactions. Utilized Azure Machine Learning for model training and deployment.

Customer Service Chatbot (Innovate AI Labs): Designed and implemented a natural language processing system using Hugging Face Transformers and Python to power a customer service chatbot. Improved customer satisfaction scores by 15% and reduced customer service costs by 10%.

Predictive Maintenance Model (Tech Solutions Ltd.): Developed a predictive maintenance model using machine learning algorithms to predict equipment failures in a manufacturing plant. Reduced equipment downtime by 20% and saved the company £500,000 annually.

Recommendation System (Tech Solutions Ltd.): Developed a recommendation system for an e-commerce platform using collaborative filtering and content-based filtering techniques. Increased sales by 10% and improved customer engagement.
