Professional Summary

Highly accomplished and results-oriented Principal Data Architect with 10+ years of experience in designing, developing, and implementing innovative AI/ML solutions at scale. Proven ability to lead cross-functional teams, manage complex projects, and deliver impactful business outcomes. Expertise in leveraging cutting-edge technologies such as TensorFlow, Hugging Face Transformers, and Microsoft Azure to build robust and scalable AI/ML systems. Passionate about applying AI/ML to solve real-world problems and driving positive change.

Education

Massachusetts Institute of Technology (MIT), Cambridge, MA |

Master of Science in Computer Science, 2013

** Specialization: Artificial Intelligence and Machine Learning * GPA: 3.9/4.0 * Thesis: "Novel Deep Learning Architectures for Natural Language Processing" * Bachelor of Science in Electrical Engineering and Computer Science*, 2011 * GPA: 3.8/4.0*

Technical Skills

Programming Languages: R, Python (Pandas, NumPy, Scikit-learn), Java, SQL, C++

AI/ML Frameworks & Libraries: TensorFlow, Keras, PyTorch, Hugging Face Transformers, scikit-learn, XGBoost, LightGBM

Cloud Platforms: Microsoft Azure (Azure Machine Learning, Azure Databricks, Azure Cognitive Services), AWS (Amazon SageMaker), Google Cloud Platform (GCP)

Databases: SQL Server, MySQL, PostgreSQL, MongoDB

Big Data Technologies: Hadoop, Spark, Hive

Data Visualization: Tableau, Power BI, Matplotlib, Seaborn

Professional Experience

Innovate AI Labs, Boston, MA |

Principal Data Architect | June 2020 – Present

- Led the design and implementation of a large-scale AI-powered recommendation system for a major e-commerce client, resulting in a 25% increase in sales conversion rates.
- Developed and deployed a real-time fraud detection system using machine learning algorithms, reducing fraudulent transactions by 15%.
- Mentored and guided junior data scientists and engineers, fostering a culture of innovation and collaboration.
- Successfully secured and managed a \$2M research grant for the development of novel AI algorithms for natural language processing.
- Architected and implemented a robust data pipeline using Azure Databricks, improving data processing efficiency by 40%.

Data Science Solutions, New York, NY |

Senior Data Scientist | June 2017 – June 2020

- Developed and deployed machine learning models for various clients across different industries, including finance, healthcare, and retail.
- Conducted extensive data analysis and feature engineering to improve the accuracy and performance of machine learning models.
- Collaborated with cross-functional teams to define project requirements, develop solutions, and deliver impactful results.
- Presented findings and recommendations to senior management and clients through clear and concise presentations and reports.

TechCorp Innovations, San Francisco, CA |

Data Scientist | June 2015 – June 2017

- Built and deployed predictive models using various machine learning algorithms to improve customer retention and acquisition.
- Performed A/B testing to optimize marketing campaigns and improve campaign ROI.
- Conducted data mining and analysis to identify trends and patterns in customer behavior.

AI/ML Projects

Project Title: Real-time Fraud Detection System | Innovate AI Labs | 2021-2022

* Developed a real-time fraud detection system using a combination of anomaly detection and classification algorithms. Utilized TensorFlow and Azure Stream

Analytics for real-time processing and deployed the model to Azure Kubernetes Service (AKS). Achieved 95% accuracy in detecting fraudulent transactions.

Project Title: AI-Powered Recommendation Engine | Innovate AI Labs | 2020-2021 * Designed and implemented a large-scale recommendation engine using collaborative filtering and content-based filtering techniques. Leveraged Hugging Face Transformers for natural language processing tasks to improve recommendation accuracy. Deployed the model to Azure Machine Learning. Resulted in a 25% increase in sales conversion.

Project Title: Sentiment Analysis of Social Media Data | Data Science Solutions | 2018-2019 * Developed a sentiment analysis model using deep learning techniques to analyze social media data and understand public opinion on various products and brands. Utilized Python, PyTorch, and various NLP techniques. Results were used to inform marketing strategies and product development decisions.
