

Julian Renwick (650) 555-1212 | julian.renwick@email.com | linkedin.com/in/julianrenwick | github.com/julianrenwick

Professional Summary

Highly accomplished and results-oriented Principal Data Architect with 12+ years of experience leading the design, development, and implementation of complex AI/ML solutions at scale. Proven ability to translate business requirements into robust, scalable, and maintainable data architectures leveraging cutting-edge technologies. Expertise in developing and deploying machine learning models across various cloud platforms, specializing in natural language processing and computer vision. Passionate about driving innovation and fostering collaborative team environments to deliver impactful business outcomes.

Education

Stanford University, Stanford, CA * Master of Science in Computer Science, Artificial Intelligence Specialization (2011) * Bachelor of Science in Computer Science (2009) * GPA: 3.9/4.0 * Relevant Coursework: Machine Learning, Deep Learning, Natural Language Processing, Computer Vision, Distributed Systems, Database Systems, Algorithm Design and Analysis

Technical Skills

- **Programming Languages:** Python (Expert), C++ (Proficient), Java (Proficient)
- **Deep Learning Frameworks:** PyTorch (Expert), TensorFlow (Proficient), Keras (Proficient)
- **NLP Libraries:** Hugging Face Transformers (Expert), spaCy (Proficient), NLTK (Proficient)
- **Cloud Platforms:** Microsoft Azure (Expert), AWS (Proficient), GCP (Familiar)
- **Databases:** SQL Server, PostgreSQL, MySQL, MongoDB
- **Big Data Technologies:** Spark, Hadoop, Hive
- **Data Visualization:** Tableau, Power BI
- **Version Control:** Git

Professional Experience

Quantum Horizon Corp., Mountain View, CA * **Principal Data Architect** (2018 – Present) * Led the design and implementation of a large-scale AI-powered recommendation engine resulting in a 25% increase in customer engagement and a 15% increase in sales. * Developed and deployed a real-time fraud detection system using machine learning algorithms, reducing fraudulent transactions by 30%. * Mentored and guided a team of 10 data engineers and scientists in best practices for data engineering, model development, and deployment. * Successfully migrated legacy data infrastructure to a cloud-based solution on Microsoft Azure, improving scalability and reducing operational costs by 20%. *

Spearheaded the adoption of new technologies, including Hugging Face Transformers, improving the accuracy and efficiency of NLP models.

NovaTech Solutions, San Jose, CA * **Senior Data Scientist** (2015 – 2018) *

Developed and deployed various machine learning models for customer churn prediction, resulting in a 10% reduction in customer churn. * Built and maintained data pipelines using Spark and Hadoop for processing large datasets. * Collaborated with cross-functional teams to define business requirements and translate them into technical solutions.

Innovate Technologies, Palo Alto, CA * **Data Scientist** (2011 – 2015) * Developed and implemented machine learning algorithms for image recognition and object detection. * Conducted A/B testing to optimize model performance and improve business outcomes. * Contributed to the development of a new product using cutting-edge AI technologies.

AI/ML Projects

- **Real-time Sentiment Analysis System (Quantum Horizon Corp.):** Developed a real-time sentiment analysis system using Hugging Face Transformers to analyze social media data and provide insights into customer opinions. Deployed on Azure Kubernetes Service (AKS).
- **Image Classification Model for Medical Diagnosis (NovaTech Solutions):** Developed a highly accurate image classification model for medical diagnosis using convolutional neural networks (CNNs) and transfer learning techniques. Achieved 95% accuracy on a held-out test set.
- **Predictive Maintenance Model for Industrial Equipment (Innovate Technologies):** Developed a predictive maintenance model for industrial equipment using time series analysis and machine learning algorithms. Reduced equipment downtime by 15%.
