Professional Summary

Highly accomplished and results-oriented Principal Data Architect with 12+ years of experience leading the design, development, and implementation of complex AI/ML solutions at scale. Proven ability to translate business needs into robust, scalable, and maintainable data architectures that drive significant improvements in efficiency, accuracy, and profitability. Expertise in leveraging cutting-edge technologies, including Python, Java, Go, PyTorch, Keras, and Microsoft Azure, to build and deploy innovative AI/ML models across diverse industries. Adept at collaborating with cross-functional teams, mentoring junior engineers, and fostering a culture of innovation and continuous improvement.

Education

University of Oxford, Oxford, UK | Master of Science (MSc), Computer Science, 2011 | *Thesis: "Novel Applications of Deep Learning in Natural Language Processing"*

University of Oxford, Oxford, UK | Bachelor of Science (BSc), Mathematics, 2009

Technical Skills

Programming Languages: Python (Expert), Java (Proficient), Go (Proficient), C++ (Intermediate), SQL (Expert)

Machine Learning Frameworks: PyTorch (Expert), TensorFlow (Proficient), Keras (Expert), Scikit-learn (Proficient)

Cloud Platforms: Microsoft Azure (Expert), AWS (Proficient), GCP (Intermediate)

Databases: SQL Server, MySQL, PostgreSQL, MongoDB, Cassandra

Big Data Technologies: Hadoop, Spark, Hive

Other: Docker, Kubernetes, Git, Agile methodologies

Professional Experience

Quantum Horizon Corp., San Francisco, CA | **Principal Data Architect** | 2018 – Present

- Led the design and implementation of a large-scale AI-powered recommendation engine that increased customer engagement by 30% and revenue by 15%.
- Developed and deployed a real-time fraud detection system using machine learning algorithms, resulting in a 20% reduction in fraudulent transactions.
- Architected and managed a cloud-based data platform on Microsoft Azure, improving data accessibility and scalability.
- Mentored and trained junior data engineers and architects.
- Successfully managed a team of 10 engineers and delivered projects on time and within budget.

NovaTech Solutions, Mountain View, CA | **Senior Data Scientist** | 2015 – 2018

- Developed and deployed several machine learning models for various clients, including a sentiment analysis model for social media data and a predictive maintenance model for manufacturing equipment.
- Conducted extensive data analysis and visualization to identify key insights and trends.
- Collaborated with cross-functional teams to define project requirements and deliver high-quality results.

Innovatech Inc., Palo Alto, CA | **Data Scientist** | 2011 – 2015

- Developed and implemented machine learning algorithms for various applications, including image recognition and natural language processing.
- Conducted research and development on new machine learning techniques.
- Contributed to the development of several successful data science projects.

AI/ML Projects

Project 1: Real-time Fraud Detection System (Quantum Horizon Corp.)

- Developed a real-time fraud detection system using a combination of supervised and unsupervised machine learning techniques.
- Achieved a 95% accuracy rate in detecting fraudulent transactions.
- Deployed the system on Microsoft Azure cloud platform.

Project 2: AI-Powered Recommendation Engine (Quantum Horizon Corp.)

- Designed and implemented an AI-powered recommendation engine using collaborative filtering and content-based filtering techniques.

- Increased customer engagement by 30% and revenue by 15%.

Project 3: Predictive Maintenance Model (NovaTech Solutions)

- Developed a predictive maintenance model for manufacturing equipment using time series analysis and machine learning.
- Reduced equipment downtime by 15%.

Project 4: Sentiment Analysis Model (NovaTech Solutions)

- Developed a sentiment analysis model for social media data using natural language processing techniques.
- Achieved a 90% accuracy rate in classifying sentiment.
