Professional Summary

Highly motivated and results-oriented Machine Learning Research Fellow at Innovate AI Labs with 5+ years of experience in developing and deploying cutting-edge AI/ML solutions. Proven ability to translate complex research into practical applications, leveraging expertise in deep learning, natural language processing, and computer vision. Seeking a challenging role where I can contribute my skills and passion for innovation to a forward-thinking organization.

Education

- **University of Oxford, Oxford, UK**
 - Doctor of Philosophy (Ph.D.), Computer Science, 2020
 - Dissertation: "Novel Architectures for Deep Reinforcement Learning in Robotics"
 - GPA: 4.0/4.0
- **University of Oxford, Oxford, UK**
 - Master of Science (M.Sc.), Computer Science, 2018
 - GPA: 3.9/4.0
- **University of California, Berkeley, CA, USA**
 - Bachelor of Science (B.Sc.), Computer Science, 2016
 - GPA: 3.8/4.0

Technical Skills

- **Programming Languages:** Python (Expert), Go (Proficient), C++ (Proficient)
- **Machine Learning Libraries:** PyTorch (Expert), TensorFlow (Proficient), Scikit-learn (Expert), Keras (Proficient)
- **Cloud Platforms:** Microsoft Azure (Expert), AWS (Proficient), Google Cloud Platform (Familiar)
- **Databases:** SQL, NoSQL (MongoDB, Cassandra)
- **Big Data Technologies:** Spark, Hadoop
- **Version Control:** Git
- **Operating Systems:** Linux (Expert), Windows (Proficient), macOS (Proficient)

Professional Experience

- **Machine Learning Research Fellow, Innovate AI Labs, San Francisco, CA**
| June 2020 – Present
 - Led the research and development of a novel deep learning model for anomaly detection in industrial sensor data, resulting in a 20% reduction in false positives.

- Developed and implemented a real-time object detection system using YOLOv5, deployed on Microsoft Azure, achieving 95% accuracy.
- Mentored junior researchers and provided technical guidance on various AI/ML projects.
- Published two peer-reviewed papers in top-tier AI conferences.
- **Software Engineering Intern, TechCorp Solutions, Mountain View, CA** | June 2019 – August 2019
 - Developed and maintained backend services for a large-scale e-commerce platform using Go and Microservices architecture.
 - Implemented a new recommendation engine using collaborative filtering techniques, resulting in a 15% increase in sales conversion.

AI/ML Projects

- **Anomaly Detection in Industrial Sensor Data:** Developed a deep learning model using LSTM networks to detect anomalies in real-time sensor data from manufacturing plants. Achieved 98% accuracy in detecting anomalies. (PyTorch, Azure)
- **Real-time Object Detection System:** Developed a real-time object detection system using YOLOv5, deployed on Microsoft Azure, achieving 95% accuracy. (PyTorch, Azure, C++)
- **Natural Language Processing for Sentiment Analysis:** Built a sentiment analysis model using transformer networks to analyze customer reviews and predict customer satisfaction. Achieved 92% accuracy. (PyTorch, Scikit-learn)
- **Deep Reinforcement Learning for Robotics:** Developed a deep reinforcement learning algorithm for controlling a robotic arm to perform complex manipulation tasks. (PyTorch, TensorFlow)
