

Aurora Cromwell (123) 456-7890 | aurora.cromwell@email.com | linkedin.com/in/auroracromwell | github.com/auroracromwell

Professional Summary

Highly accomplished and results-oriented Principal Data Architect with 10+ years of experience in designing, developing, and deploying innovative AI/ML solutions at scale. Proven ability to lead cross-functional teams, manage complex projects, and deliver impactful business outcomes. Expertise in leveraging cutting-edge technologies like PyTorch, Hugging Face Transformers, and AWS to build robust and scalable AI systems. Passionate about pushing the boundaries of AI and contributing to the development of next-generation intelligent applications.

Education

Carnegie Mellon University, Pittsburgh, PA * **Master of Science in Computer Science**, May 2013 * Specialization: Artificial Intelligence * GPA: 3.9/4.0 * Thesis: "Novel Approaches to Deep Reinforcement Learning for Robotics" * **Bachelor of Science in Computer Science**, May 2011 * Minor: Mathematics * GPA: 3.8/4.0

Technical Skills

- **Programming Languages:** Java, Python (Pandas, NumPy, Scikit-learn), R, SQL
- **Deep Learning Frameworks:** PyTorch, TensorFlow, Keras
- **NLP Libraries:** Hugging Face Transformers, spaCy, NLTK
- **Cloud Computing:** AWS (EC2, S3, RDS, Lambda, SageMaker), GCP (Compute Engine, Cloud Storage, BigQuery)
- **Databases:** PostgreSQL, MySQL, MongoDB
- **Big Data Technologies:** Spark, Hadoop
- **Version Control:** Git
- **Containerization:** Docker, Kubernetes

Professional Experience

Innovate AI Labs, Pittsburgh, PA **Principal Data Architect** | June 2020 – Present

- * Led the design and implementation of a large-scale AI-powered recommendation system resulting in a 25% increase in user engagement.
- * Developed and deployed a real-time fraud detection system using machine learning algorithms, reducing fraudulent transactions by 15%.
- * Mentored junior data scientists and engineers, fostering a collaborative and innovative team environment.
- * Successfully migrated the company's data infrastructure to AWS, improving scalability and reducing operational costs.
- * Spearheaded the adoption of new AI/ML technologies, including PyTorch and Hugging Face Transformers, improving model performance and development speed.

Data Science Solutions Inc., New York, NY **Senior Data Scientist** | June 2015 – June 2020 * Developed and deployed predictive models for various clients across multiple industries, including finance, healthcare, and retail. * Designed and implemented data pipelines for processing and analyzing large datasets using Spark and Hadoop. * Collaborated with cross-functional teams to define business requirements and translate them into technical specifications. * Presented technical findings and recommendations to both technical and non-technical audiences.

Software Engineer | June 2013 – June 2015 * Developed and maintained software applications using Java and other technologies. * Contributed to the development of a new product using agile development methodologies.

AI/ML Projects

- **Real-time Sentiment Analysis System (Innovate AI Labs):** Developed a system using Hugging Face Transformers to analyze social media data and predict market trends in real time. Utilized AWS Lambda for serverless deployment.
- **Image Recognition System for Medical Diagnosis (Data Science Solutions Inc.):** Built a convolutional neural network using PyTorch to classify medical images and assist in disease diagnosis. Achieved 95% accuracy on a test dataset.
- **Predictive Maintenance Model for Industrial Equipment (Data Science Solutions Inc.):** Developed a time series model using LSTM networks to predict equipment failures and optimize maintenance schedules. Resulted in a 10% reduction in downtime.
- **Natural Language Processing for Chatbot Development (Personal Project):** Built a conversational chatbot using Python and NLTK, demonstrating proficiency in natural language understanding and generation.
