Professional Summary

Highly accomplished and results-oriented Principal Data Architect with 10+ years of experience in designing, developing, and deploying innovative AI/ML solutions within large-scale, complex environments. Proven ability to lead cross-functional teams, mentor junior engineers, and translate complex business requirements into robust, scalable technical architectures. Expertise in leveraging cutting-edge technologies including Python, Go, Java, Scikit-learn, TensorFlow, and Microsoft Azure to deliver impactful business outcomes. Passionate about pushing the boundaries of AI/ML to solve challenging real-world problems.

Education

- **University of Oxford, Oxford, UK** - Doctor of Philosophy (Ph.D.), Computer Science, 2013
 - Dissertation: "Novel Approaches to Deep Reinforcement Learning for Robotics"
- **University of Oxford, Oxford, UK** - Master of Science (M.Sc.), Computer Science, 2011
- **University of California, Berkeley, CA, USA** - Bachelor of Science (B.Sc.), Computer Science, 2009

Technical Skills

- **Programming Languages:** Python (Expert), Go (Proficient), Java (Proficient), C++ (Intermediate), SQL (Proficient)
- **Machine Learning Libraries:** Scikit-learn (Expert), TensorFlow (Expert), PyTorch (Proficient), Keras (Proficient)
- **Cloud Platforms:** Microsoft Azure (Expert), AWS (Proficient), GCP (Intermediate)
- **Databases:** SQL Server, PostgreSQL, MongoDB, Cassandra
- **Big Data Technologies:** Hadoop, Spark, Kafka
- **DevOps:** Docker, Kubernetes, CI/CD pipelines
- **Data Visualization:** Tableau, Power BI, Matplotlib, Seaborn

Professional Experience

- **Innovate AI Labs, San Francisco, CA** - Principal Data Architect, 2018 - Present
 - Led the architecture and development of a novel AI-powered fraud detection system, resulting in a 25% reduction in fraudulent transactions.
 - Mentored and trained a team of 5 junior data engineers and scientists.
 - Designed and implemented a scalable data pipeline using Azure Databricks and Kafka, processing over 10 terabytes of data daily.
 - Successfully migrated legacy systems to a cloud-based architecture, improving performance and scalability.
 - Developed and delivered presentations on advanced AI/ML techniques to both technical and non-technical audiences.
- **DataWise Solutions, Seattle, WA** - Senior Data Scientist, 2015 - 2018
 - Developed and deployed several machine learning models for various clients, including a recommendation engine for an e-commerce platform and a predictive maintenance model for a manufacturing company.
 - Conducted extensive data analysis and feature engineering to improve model accuracy and performance.
 - Collaborated with cross-functional teams to define business requirements and translate them into technical specifications.
- **TechCorp Inc., London, UK** - Data Scientist, 2013 - 2015
 - Developed and implemented machine learning algorithms for natural language processing tasks, such as sentiment analysis and text classification.
 - Contributed to the development of a large-scale data warehouse for storing and processing customer data.

AI/ML Projects

- **Fraud Detection System (Innovate AI Labs):** Developed a real-time fraud detection system using a combination of supervised and unsupervised learning techniques, achieving a 95% accuracy rate. Utilized TensorFlow and Azure Machine Learning services.
- **Recommendation Engine (DataWise Solutions):** Built a collaborative filtering-based recommendation engine for an e-commerce platform, resulting in a 15% increase in sales. Utilized Scikit-learn and deployed on AWS.

- **Predictive Maintenance Model (DataWise Solutions):** Developed a predictive maintenance model for a manufacturing company, reducing downtime by 10%. Utilized time series analysis and machine learning techniques.
- **Sentiment Analysis Engine (TechCorp Inc.):** Developed a sentiment analysis engine for processing customer reviews, achieving an accuracy rate of 88%. Utilized natural language processing techniques and Python.
