

Aurora Renwick (650) 555-1212 | aurora.renwick@email.com | linkedin.com/in/aurorarenwick | github.com/aurorarenwick

Professional Summary

Highly accomplished and results-oriented Lead Machine Learning Scientist with 8+ years of experience at Veridian Dynamics, specializing in developing and deploying cutting-edge AI/ML solutions across diverse industries. Proven ability to lead teams, manage complex projects, and deliver impactful results. Expertise in algorithm design, model training, deployment, and optimization using various technologies including TensorFlow, Scikit-learn, GCP, and programming languages such as R, Go, and Java. Passionate about leveraging AI to solve challenging business problems and drive innovation.

Education

- **Stanford University**, Stanford, CA
 - Ph.D. in Computer Science, specializing in Artificial Intelligence (2015)
 - Dissertation: "Novel Deep Learning Architectures for Natural Language Processing in Low-Resource Settings"
 - GPA: 3.9/4.0
- **University of California, Berkeley**, Berkeley, CA
 - B.S. in Computer Science (2011)
 - GPA: 3.8/4.0

Technical Skills

- **Programming Languages:** R, Go, Java, Python (NumPy, Pandas, SciPy), C++
- **Machine Learning Libraries:** TensorFlow, PyTorch, Scikit-learn, Keras, XGBoost
- **Cloud Platforms:** Google Cloud Platform (GCP) (Compute Engine, Cloud Storage, BigQuery, Dataflow), AWS (S3, EC2), Azure
- **Databases:** SQL, NoSQL (MongoDB, Cassandra)
- **Big Data Technologies:** Spark, Hadoop
- **Data Visualization:** Tableau, Matplotlib, Seaborn
- **Version Control:** Git

Professional Experience

- **Veridian Dynamics**, Sunnyvale, CA
 - **Lead Machine Learning Scientist** (2015 – Present)
 - Led a team of 5 data scientists in the development and deployment of a real-time fraud detection system, resulting in a 20% reduction in fraudulent transactions within the first year.

- Developed and implemented a novel deep learning model for customer churn prediction, improving prediction accuracy by 15% compared to existing models.
- Designed and implemented a scalable machine learning pipeline using GCP for processing and analyzing large datasets (terabytes of data).
- Mentored junior data scientists and provided technical guidance on project execution and best practices.
- Successfully secured funding for new AI/ML initiatives by demonstrating strong ROI potential.
- **Innovatech Solutions**, Mountain View, CA
 - **Machine Learning Engineer** (2013 – 2015)
 - Developed and deployed machine learning models for various clients across different industries, including finance, healthcare, and retail.
 - Conducted extensive data analysis and feature engineering to improve model performance.
 - Collaborated with cross-functional teams to integrate machine learning models into existing systems.

AI/ML Projects

- **Real-time Fraud Detection System (Veridian Dynamics):** Developed a real-time fraud detection system using a combination of supervised and unsupervised learning techniques. Utilized TensorFlow and GCP for model training and deployment. Achieved a 20% reduction in fraudulent transactions.
- **Customer Churn Prediction Model (Veridian Dynamics):** Developed a deep learning model for predicting customer churn using recurrent neural networks. Improved prediction accuracy by 15% compared to existing models.
- **Image Recognition System (Innovatech Solutions):** Developed an image recognition system for identifying defects in manufactured products. Used convolutional neural networks and transfer learning techniques to achieve high accuracy.
- **Natural Language Processing for Low-Resource Languages (PhD Dissertation):** Developed novel deep learning architectures for natural language processing in low-resource settings. Published research findings in top-tier AI conferences.
