Professional Summary

Highly accomplished and results-oriented Senior AI Engineer with 8+ years of experience at Innovate AI Labs, specializing in the development and deployment of cutting-edge machine learning models. Proven ability to lead teams, mentor junior engineers, and deliver innovative solutions to complex business problems. Expertise in Go, R, Python, TensorFlow, Keras, and AWS cloud services. Passionate about leveraging AI/ML to solve real-world challenges and drive impactful business outcomes.

Education

Carnegie Mellon University, Pittsburgh, PA | Master of Science in Artificial Intelligence, 2015 | Bachelor of Science in Computer Science, 2013 | GPA: 3.9/4.0 | Relevant Coursework: Machine Learning, Deep Learning, Natural Language Processing, Computer Vision, Reinforcement Learning, Distributed Systems, Algorithm Design and Analysis

Technical Skills

Programming Languages: Go, Python (Pandas, NumPy, Scikit-learn), R (dplyr, ggplot2), SQL

Machine Learning Frameworks: TensorFlow, Keras, PyTorch

Cloud Computing: AWS (EC2, S3, Lambda, RDS, SageMaker)

Databases: PostgreSQL, MySQL

Big Data Technologies: Spark, Hadoop

Version Control: Git

Other: Docker, Kubernetes, Agile methodologies

Professional Experience

Senior AI Engineer, Innovate AI Labs, Pittsburgh, PA | June 2018 – Present * Led the development and deployment of a novel deep learning model for fraud detection, resulting in a 20% reduction in fraudulent transactions. * Mentored a team of 4 junior engineers, providing guidance on best practices in software development and machine learning. * Designed and implemented a scalable data pipeline using AWS services, improving data processing efficiency by 30%. * Successfully secured a \$1M grant for research and development of AI-powered solutions for healthcare. * Presented research findings at multiple international conferences, including NeurIPS and ICML.

AI Engineer, Tech Solutions Inc., Pittsburgh, PA | June 2015 – June 2018 * Developed and deployed machine learning models for various clients across different industries, including finance, healthcare, and retail. * Designed and implemented custom algorithms for natural language processing and computer vision tasks. * Collaborated with cross-functional teams to integrate machine learning models into existing systems. * Contributed to the development of a new product using deep learning for image recognition.

AI/ML Projects

Fraud Detection System (Innovate AI Labs): Developed a deep learning model using TensorFlow and Keras to detect fraudulent transactions with a 95% accuracy rate. Deployed the model on AWS using SageMaker.

Healthcare Predictive Modeling (Innovate AI Labs): Built a predictive model using R and machine learning algorithms to predict patient readmission rates. Improved prediction accuracy by 15% compared to existing models.

Natural Language Processing for Customer Service (Tech Solutions Inc.): Developed a natural language processing system using Python and spaCy to automate customer service inquiries. Reduced customer support costs by 10%.

Image Recognition System (Tech Solutions Inc.): Built an image recognition system using TensorFlow and Keras to identify defects in manufactured products. Improved defect detection rate by 20%.

Recommendation System (Personal Project): Developed a recommendation system using Python and collaborative filtering techniques to recommend movies to users based on their viewing history. Achieved a 75% accuracy rate in recommending relevant movies.
