Professional Summary

Highly accomplished and results-oriented Lead Machine Learning Scientist with 8+ years of experience in developing and deploying cutting-edge AI/ML solutions across diverse industries. Proven ability to lead teams, manage complex projects, and deliver impactful results. Expertise in deep learning, natural language processing (NLP), and computer vision, with a strong foundation in software engineering and cloud computing. Passionate about leveraging AI to solve challenging problems and drive innovation.

Education

Carnegie Mellon University, Pittsburgh, PA | Master of Science in Machine Learning, 2015

Bachelor of Science in Computer Science, 2013

GPA: 3.9/4.0

Relevant Coursework: Deep Learning, Natural Language Processing, Computer Vision, Reinforcement Learning, Distributed Systems, Algorithm Design and Analysis

Technical Skills

Programming Languages: Go, C++, Python (Pandas, NumPy, Scikit-learn)

Deep Learning Frameworks: TensorFlow, PyTorch, Hugging Face Transformers

Cloud Computing: AWS (EC2, S3, Lambda, SageMaker)

Databases: PostgreSQL, MySQL, MongoDB

Version Control: Git

Big Data Technologies: Spark, Hadoop

Other: Docker, Kubernetes, Agile methodologies

Professional Experience

Lead Machine Learning Scientist, Aetherium Analytics, Pittsburgh, PA | 2020 – Present

- * Led a team of 5 data scientists in the development and deployment of a real-time fraud detection system, resulting in a 20% reduction in fraudulent transactions.
- * Designed and implemented a novel NLP model using Hugging Face Transformers for sentiment analysis of customer reviews, improving customer service response times by 15%.
- * Developed and deployed a computer vision model for automated image classification, increasing efficiency in product quality control by 30%.
- * Mentored junior data scientists and provided technical guidance on project execution and best practices.
- * Successfully secured a \$2M research grant for the development of a new AI-powered platform.

Senior Machine Learning Engineer, NovaTech Solutions, Boston, MA | 2017 – 2020

- * Developed and deployed several machine learning models for various clients, including a recommendation system for an e-commerce platform and a predictive maintenance model for a manufacturing company.
- * Implemented and optimized machine learning pipelines using TensorFlow and AWS SageMaker.
- * Collaborated with cross-functional teams to define project requirements and deliver solutions that met business needs.
- * Contributed to the development of internal tools and processes for data management and model deployment.

Machine Learning Engineer, Cybernetics Corp, San Francisco, CA | 2015 – 2017

- * Developed and deployed machine learning models for various applications, including natural language processing and time series forecasting.
- * Implemented machine learning algorithms using Python and other relevant tools.
- * Conducted data analysis and feature engineering to improve model performance.
- * Contributed to the development of internal machine learning libraries and tools.

AI/ML Projects

Real-time Fraud Detection System (Aetherium Analytics): Developed a real-time fraud detection system using a combination of supervised and unsupervised learning techniques. Achieved 95% accuracy in detecting fraudulent transactions. Utilized TensorFlow, AWS SageMaker, and PostgreSQL.

Sentiment Analysis of Customer Reviews (Aetherium Analytics): Developed a sentiment analysis model using Hugging Face Transformers to analyze customer reviews and identify areas for improvement in customer service. Improved customer satisfaction scores by 10%.

Automated Image Classification System (Aetherium Analytics): Developed a computer vision model for automated image classification using PyTorch and transfer learning techniques. Achieved 98% accuracy in classifying images.

Predictive Maintenance Model (NovaTech Solutions): Developed a predictive maintenance model for a manufacturing company using time series analysis and machine learning techniques. Reduced maintenance costs by 15%.
